

SPRAY & MARK

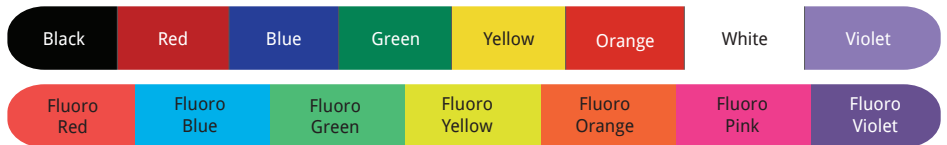

The perfect survey marker for your site

Spray & Mark has been the go-to marker of the trade industry in New Zealand for decades. Designed to create highly visible marks on a range of surfaces and useful for utility colour identification in surveying, construction, civil works and landscaping.

Features of the Spray & Mark range include:

- Vibrant colours made up of highly visible pigments and dyes
- Sturdy trigger cap ensures a consistent, no mess application
- Non-clogging formulation ensures each can empties completely
- Great coverage for reliable marking every time – get the job done!

AVAILABLE IN 15 COLOURS

CAN BE APPLIED TO THESE SURFACES

SPRAY & MARK – WHICH TYPE IS BEST FOR YOUR JOB?

Fluorescent Colours

Vibrant colours give higher visibility
Perfect for safety applications
Colours are based on fluorescent dyes
Colours will fade quicker in sunlight
Ideal for more temporary applications.

VS

Standard Colours

Available in a wide range of solid colours
Great for colour coding applications
Colours are pigment-based
Colours will last longer.

All markings are dependent on surface type and environmental conditions
